

Flint Knapping Workshop with Dr James Dilley

The Antoinette Centre Quex Park Birchington

ANCIENTCRAFT

Discover the oldest craft in the world

How did our earliest ancestors make tools to survive through the Stone Age? Find out with experimental archaeologist James Dilley who will guide you through the process of flintknapping, making flint tools that you take home at the end of the workshop.

The oldest flint tools found in Britain date to around 1 million years ago, the latest around 3000 years ago so you will have the chance to try your hand at a process used for 99.7% of human presence in Britain!

The aim of the day will be for attendees to go home with a variety of different stone tools they have made, new flintknapping skills and a new appreciation for prehistoric technology.

Workshop Leader Dr James Dilley

Our expert flintknapping workshop leader will be Dr James Dilley of Ancientcraft, the UK's leading provider in prehistoric archaeology outreach. James is an archaeologist and craftsman who specialises in prehistoric technologies with over 17 years of experience working with museums and heritage centres around the UK such as The British Museum and Stonehenge and alongside media companies such as the BBC, Channel 4, ITV and National Geographic.

Booking
